

Change begins with us

And what do you
want to change?

**Once you change,
you can change the
world.**

Beatriz. UCJC student

SEK Education Group encompasses an educational community that fosters the development of skills that guarantee relevant, global, international and meaningful learning. The goal of this learning is to attain the full, all-round realisation of each of our students' potential to tackle the challenges set by the 21st century.

Founded in 1892, SEK Education Group brings together leadership, teaching innovation and over 130 years of tradition and history. **SEK International Schools** cater to over 6,000 students between the ages of 4 months and 18 years of age, from over 70 nationalities, at their ten schools in Spain, France, Ireland, Qatar and Saudi Arabia.

Camilo José Cela University was founded in the year 2000 as part of SEK Education Group and its mission is to serve society by educating professionals of the future and preparing them for new challenges. UCJC pursues innovation and constant evolution to meet the needs of business and society and the highest levels of rigour and excellence. Its strategic axes are entrepreneurship, technology and digitization, social commitment and well-being.

The first university of the 21st century

At Camilo José Cela University we want to do things differently. The world is continually evolving and in the face of these new challenges we offer a flexible and transversal education, fostering an entrepreneurial spirit, social innovation and helping our students acquire technological skills, essential for their personal and professional future.

Our university is looking for students who want to learn, improve and change the world. Which is why we were the first educational entity recognised with the BCorp seal in Europe. Our goal is for our students to be the best for the world.

Our four strategic axes

Entrepreneurship and innovation, through our courses such as the Bachelor's in Entrepreneurship and accelerators such as SEKLAB-Edtech Accelerator and the UCJC Impact Lab.

Technology and digitization to improve adaptation processes in the face of the digital transformation of today's society.

Social impact because we play a crucial role in achieving the SDGs by contributing to and reinforcing the interests of students and the social impact that their present and future actions should have.

Wellbeing to ensure personal balance, both physical and emotional, which may have a direct impact on the processes of acquiring content and skills.

Extended Teaching-Learning Model.

Multi-Environment Classroom

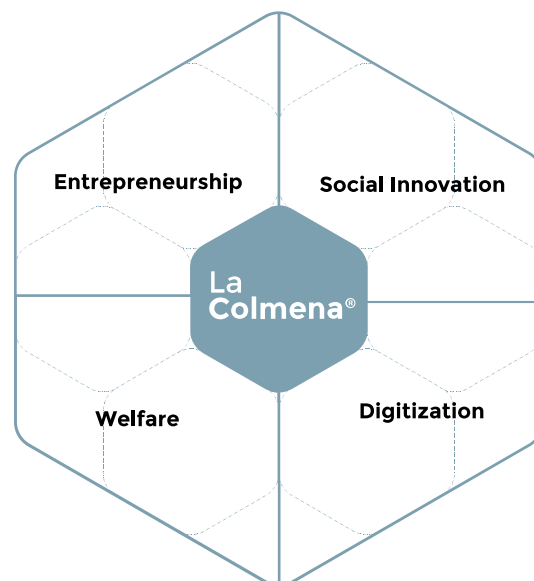

The new UCJC pedagogical framework transforms theoretical-practical teaching to provide the best learning experience for our students, with innovative teaching methods, new technologies and a face-to-face teaching model with virtual elements.

Competences Model

We live in a world characterised by **interdependence, complexity and change**, in which, in addition to updated and innovative education in each field of work specialisation, it is essential to be interdisciplinary and to have a set of transversal skills that complement this academic and professional training. These skills are tackled in a set of areas that range from the personal to the social sphere, promoting a holistic transformation process through learning.

To do this, The Hive (La Colmena) proposes a methodology based on challenges defined around our strategic axes: **entrepreneurship, digitization, social impact and well-being.**

UCJC Villafranca Campus

The campus, located in the Villafranca del Castillo residential estate, spans over 100,000 m². Surrounded by nature and just 20 minutes from the centre of Madrid. The campus is fitted with open learning spaces; the latest technology; practical work spaces for each degree; leisure spaces; meeting rooms for group work and first-rate sports facilities and two student halls of residence.

UCJC Castellana Campus

The new UCJC Castellana Campus spans four floors and an area of 11,319 square metres, 3,226 square metres are green exterior work areas. The building meets the highest standards of sustainability, energy efficiency and well-being, including the prestigious Leed Platinum certification, making it the most sustainable university campus in Spain.

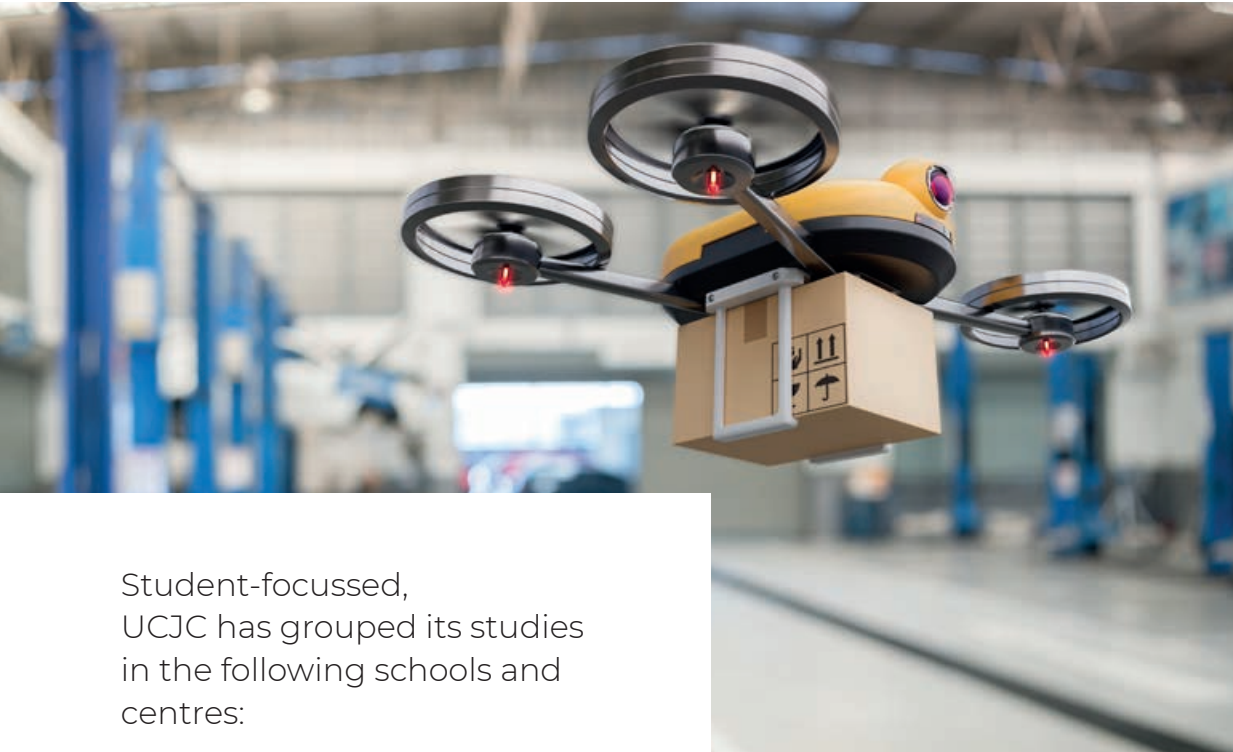

UCJC Almagro Building

Our Campus on Calle Almagro in Madrid, headquarters of the UCJC Centre for Professional Studies, serves as a link between the university and professional world. Housed in a historic building from 1920 it is a stone's throw away from Madrid's economic, business and cultural centre. It thus becomes a hub and active catalyst for intellectual and business activity at the University and the city, where lecturers, researchers and professionals share a common goal: academic excellence.

Schooner Cervantes Saavedra UCJC Campus

The schooner Cervantes Saavedra is Camilo José Cela University's training vessel, a historic three-masted brigantine of almost 50 metres in length, which since 2007 houses the UCJC Centre for Maritime Studies, devoted to marine research and seafaring-related vocational training.

Student-focussed, UCJC has grouped its studies in the following schools and centres:

School of Technology and Science

We are immersed in a technological revolution that will profoundly change the way we live, work and interact. In scope and complexity, this transformation is completely unlike any other that has been experienced before.

New digital uses allow new types of innovation and creativity in a particular field, but also in environments such as society, government, communications global, art, medicine and science.

In this sense, at UCJC we are aware of the impact that these changes will have on our environment: the necessary modification of production industries, smart cities, the application of artificial intelligence to decision-making in companies, the analysis of digital data, information management, e-commerce and the incorporation of robotics into our lives. Undoubtedly, the future will see the evolution of all areas to a new business, social and international reality.

Degree Studies at the School of Technology and Science

- Digital Arts
- Business and Technology
- Entrepreneurship and Business Management
- Computer Engineering
- Robotic Engineering and Artificial Intelligence
- Transport and Logistics
- Digital Arts + Film and Fiction
- Business and Technology + Law
- Computer Engineering + Biomedical Computer Engineering
- Computer Engineering + Robotic Engineering and Artificial Intelligence

Learn to do things differently for social progress.

Rodrigo. UCJC student

School of Health

Camilo José Cela University and HM Hospitales have joined their extensive knowledge and experience in an innovative university training project setting up **the UCJC HM Hospitales School of Health Sciences.**

With the emergence of this new school, all HM Hospitales Group hospitals are partnered with UCJC, thus constituting **the largest network of university hospitals in Spain.**

A pioneering project that incorporates hospital-based learning as a fundamental axis and backbone of the training of our future health professionals.

Therefore our students learn in a multidisciplinary perspective, open to other fields of knowledge, with an international vision and with a critical and entrepreneurial spirit, which must be added to the most up-to-date development of skills in different professional areas (nursing, psychology, physiotherapy, physical activity, nutrition and dentistry) and the ability to develop research specific to their field and disseminate it in the journals and other channels.

Our students' vocation is shared by our teachers, and together, they ensure the best training for our future graduates.

Degree Studies at the School of Health

- Biomedicine
- Physical Activity and Sports Sciences (PASS)
- Nursing
- Pharmacy
- Physiotherapy
- Biomedical Computer Engineering
- Medicine
- Nutrition and Dietetics
- Dentistry
- Psychology
- Physical Activity and Sports Sciences (PASS) + Physiotherapy
- Nursing + Physiotherapy
- Pharmacy + Nutrition and Dietetics
- Nutrition and Dietetics + Physical Activity and Sports Sciences (PASS)
- Nutrition and Dietetics + Nursing
- Nutrition and Dietetics + Physiotherapy

School of Education

Education, in its many forms, is the foundation and axis of the human being and, as a consequence, of every society. Intimately and inexorably linked to learning, education is the vehicle in which we can travel throughout our lives.

Educators have the enormous responsibility of accompanying people (children, adolescents, adults) on the path of learning. To ensure that this path is of the greatest quality both academically and in terms of values, we always look to a future that is more advanced scientifically and technologically, but also more ethically and socially committed.

Degree Studies at the School of Education

- Early Childhood Education
- Primary School Education
- Teaching
- Primary School + Early Childhood Education
- Early Childhood Education + Psychology
- Primary School Education + Psychology
- Early Childhood Education + Teaching
- Primary Education + Teaching

The School of Education hinges on these axes:

- **Educational entrepreneurship and innovation:** SEK Education Group has continually pioneered teaching innovation since its establishment in 1892. Entrepreneurship goes hand in hand with innovation, and they are both combined in the work of the SEK Lab accelerator, leader in Spain, where you can launch your project or collaborate with the most innovative education businesses.
- **Digitization and virtualization of teaching-learning:** The UCJC School of Education heads up the Extended Teaching-Learning Model (ETLM), present in the different physical and digital learning environments. Our students will learn and work with different educational technology to be future professionals.
- **Education for social impact and human development:** The School takes part in several social and educational initiatives and projects, as well education focussed on diversity, emotional intelligence and talented and gifted students.
- **Education in and for well-being:** At the School of Education, we consider self-transformation and fulfilment essential, based on self-knowledge, mental balance and self-care. Therefore, you will be trained, both personally and professionally, in personal transformation skills.

School of Communication and Humanities

Communication and the humanities in general are interdisciplinary fields that nourish the human experience. In order to study these fields it is necessary to tackle different specialities related to people, relationships, diversity and behaviour. How we think, how we feel and how we relate.

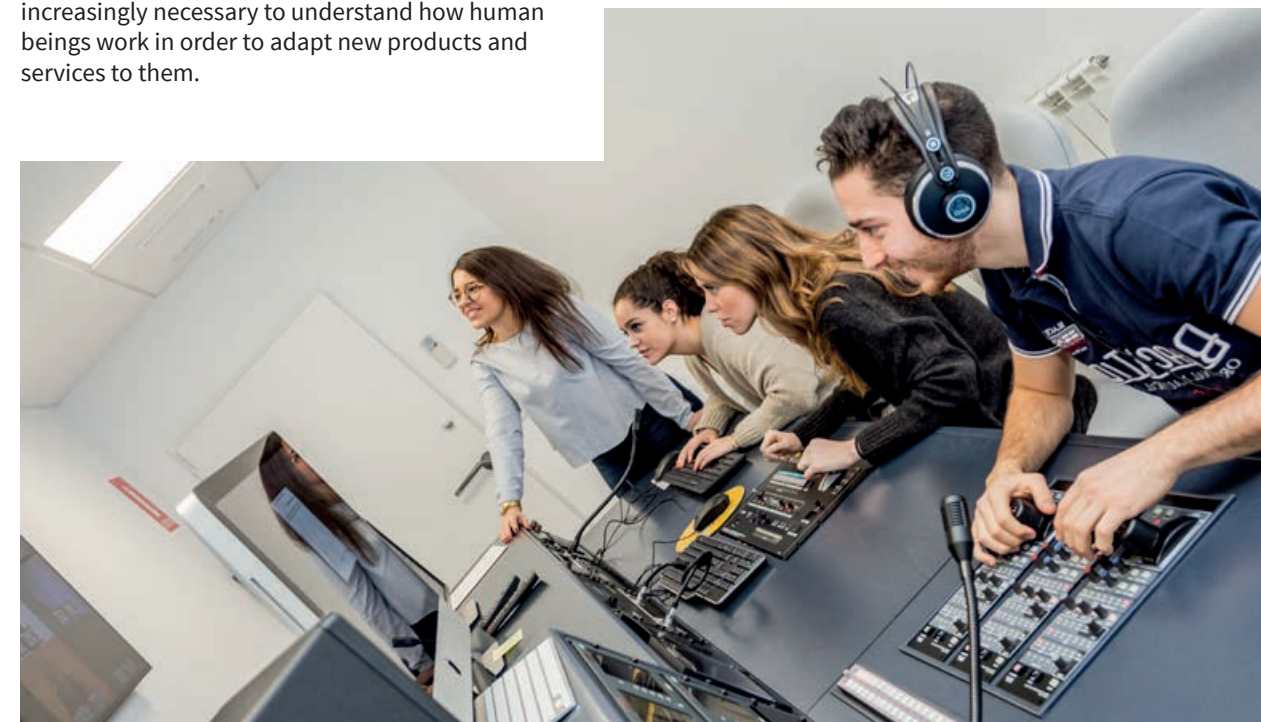

Some common and inherent elements of communication and the humanities are critical thinking; persuasion and clarification of ideas; evaluation and interpretation of information; and the ability to summarise information clearly.

At UCJC we prepare our students to become professionals capable of researching, reasoning, negotiating and transmitting ideas and generating a secure environment where people can exercise their rights to information, education, security and leisure. Professionals specialised in human sciences are increasingly in demand by all types of organisations or industries in which it is increasingly necessary to understand how human beings work in order to adapt new products and services to them.

Degree Studies at the School of Communication and Humanities

- Film and Audiovisual Fiction
- Audiovisual Communication and New Media
- Criminology and Security
- Law
- Protocol and Event Management
- Creative Advertising
- International Relations
- Criminology and Security + Law
- Criminology and Security + Psychology
- Audiovisual Communications and New Media + Cinema and Audiovisual Fiction
- Audiovisual Communication and New Media + Creative Advertising
- Creative Advertising + Protocol and Event Management
- International Relations + Law

MediaLab. Learn with the best digital and technological tools.

Centre for Professional Studies (CPS)

Our goal is to offer students an innovative and eminently practical vocational training. They will learn from prestigious professionals and academics and will be, from the very beginning, in contact with the reality of their professional sector.

Higher Level Vocational Training

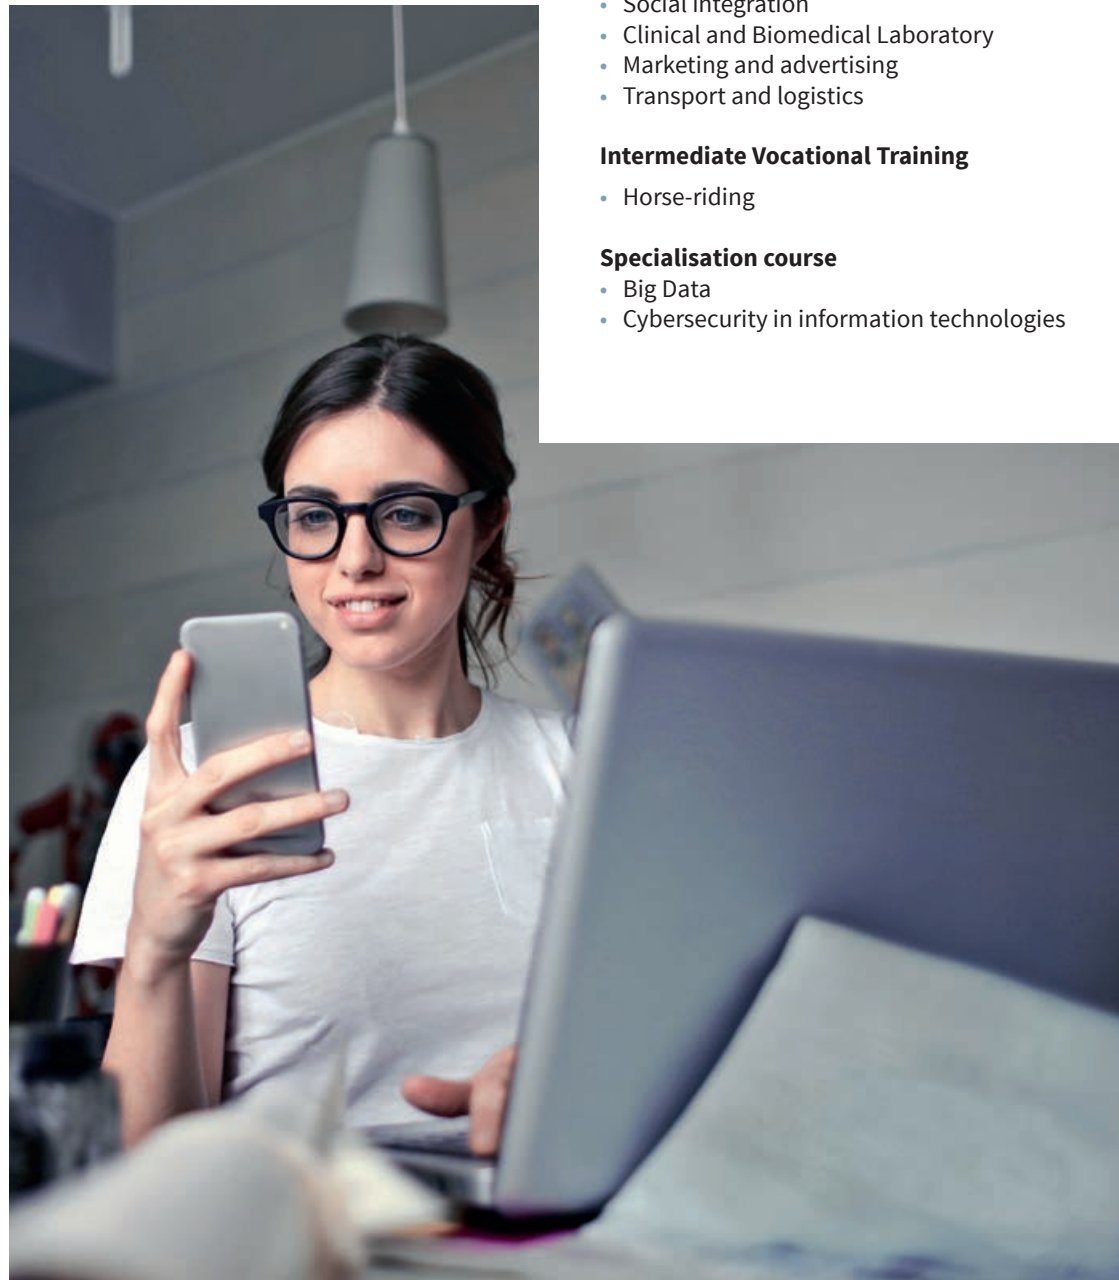

- Fitness training
- IT Network Systems Management
- Administration and finance
- Pathological Anatomy and Cytodiagnosis
- International trade
- Development of web applications
- Multiplatform Application Development
- Dietetics
- Early Childhood Education
- Teaching and Sports Instructor (TSEAS)
- Oral hygiene
- Horse-riding
- Social integration
- Clinical and Biomedical Laboratory
- Marketing and advertising
- Transport and logistics

Intermediate Vocational Training

- Horse-riding

Specialisation course

- Big Data
- Cybersecurity in information technologies

Change means knowing how to adapt.

Andrea. UCJC student

Having the ability to improve things through new ideas.

Daniel. UCJC student

Computing and Artificial Intelligence Laboratory (CAILab)

The Camilo José Cela University computing, artificial intelligence and information technologies research centre.

Its aim is to become a leading R&D and collaborating centre, providing solutions to the digital transformation of companies and organisations through research and innovation.

Courses

- Bachelor's in Computer Engineering
- Bachelor's in Biomedical Computer Engineering
- Bachelor's in Robotic Engineering and Artificial Intelligence
- Transport and Logistics
- Joint Bachelor's in Computer Engineering + Biomedical Computer Engineering
- Joint Bachelor's in Computer Engineering + Robotic Engineering and Artificial Intelligence
- Master's Degree in Data Science
- Master's Degree in Cybersecurity
- Master's Degree in Data Analysis for Epidemiology and Public Health
- UCJC Master's Degree in Big Data and Business Analytics
- UCJC Master's Degree in DevOps Engineering

BeWell Center

At the BeWell Center we respond to the need that we all have to find emotional, mental and physical balance. Our goal is the wellbeing of people and their personal fulfilment in every sense.

We offer training and support in the skills and competencies necessary to develop in fullness, happiness and harmony.

Courses

- Master's Degree in School Health
- Master's in Ongoing Training in Mindfulness
- Expert Course in Mindfulness Applied to Education

Centre for Advanced Studies (CEA)

We specialise in offering tailored training solutions designed together with our clients to adapt to their needs and to all the variables that affect the optimal and correct execution of projects.

Training at companies

Tailor-made for companies or organisations. Aimed at managers, middle and senior executives and specialised personnel in companies, in person and online.

Ongoing training

Taught by partners and institutions certified by UCJC.

Executive Training

Offer of the university's own courses.

Subsidised Training

Training for the acquisition and improvement of professional skills.

Centre for Equestrian Studies (CEE)

Integrating equestrian sports into professional and university training, Camilo José Cela University Centre for Equestrian Studies was created to meet the needs of equestrian professionals in sports, management, organisational and competition aspects, being a leading entity for training in the equestrian field. We are committed to our students acquiring the knowledge of classic horsemanship, para-equestrian and the Olympic / Paralympic disciplines. The activities take place in the excellent equestrian facilities of the UCJC Sports Club.

Courses

- Horse Riding Intermediate Vocational Training
- Horse Riding Higher Vocational Training
- Training clinics

Centre for Maritime Studies (CEM)

The Centre for Maritime Studies (CEM) was created to promote marine research and offer training to all professionals related to the sea. The headquarters of the centre are located at the Almagro Campus and on board the *Cervantes Saavedra* Campus, the university's school ship.

Courses

- Certificate of Specialisation in Basic Training in Maritime Safety

Recreational Maritime Training

- UCJC Nautical Sports Course.
- Day Skipper Qualification (PER in Spanish)

ECIJA Centre for Innovation in Law (CIJE)

The Centre for Innovation in Law was created as a collaboration between UCJC and the ECIJA Law Firm, a leading firm in Spain in TMT (Technology, Media and Telecommunications) law. We address the legal challenges posed by emerging technologies, guiding university research and, on the other hand, training our students in one of the areas of greatest employability. The Centre for Innovation in Law will offer our students a unique opportunity to enrich their training.

ECIJA

Entrepreneurship is necessary, we all have something inside us, change also begins in us.

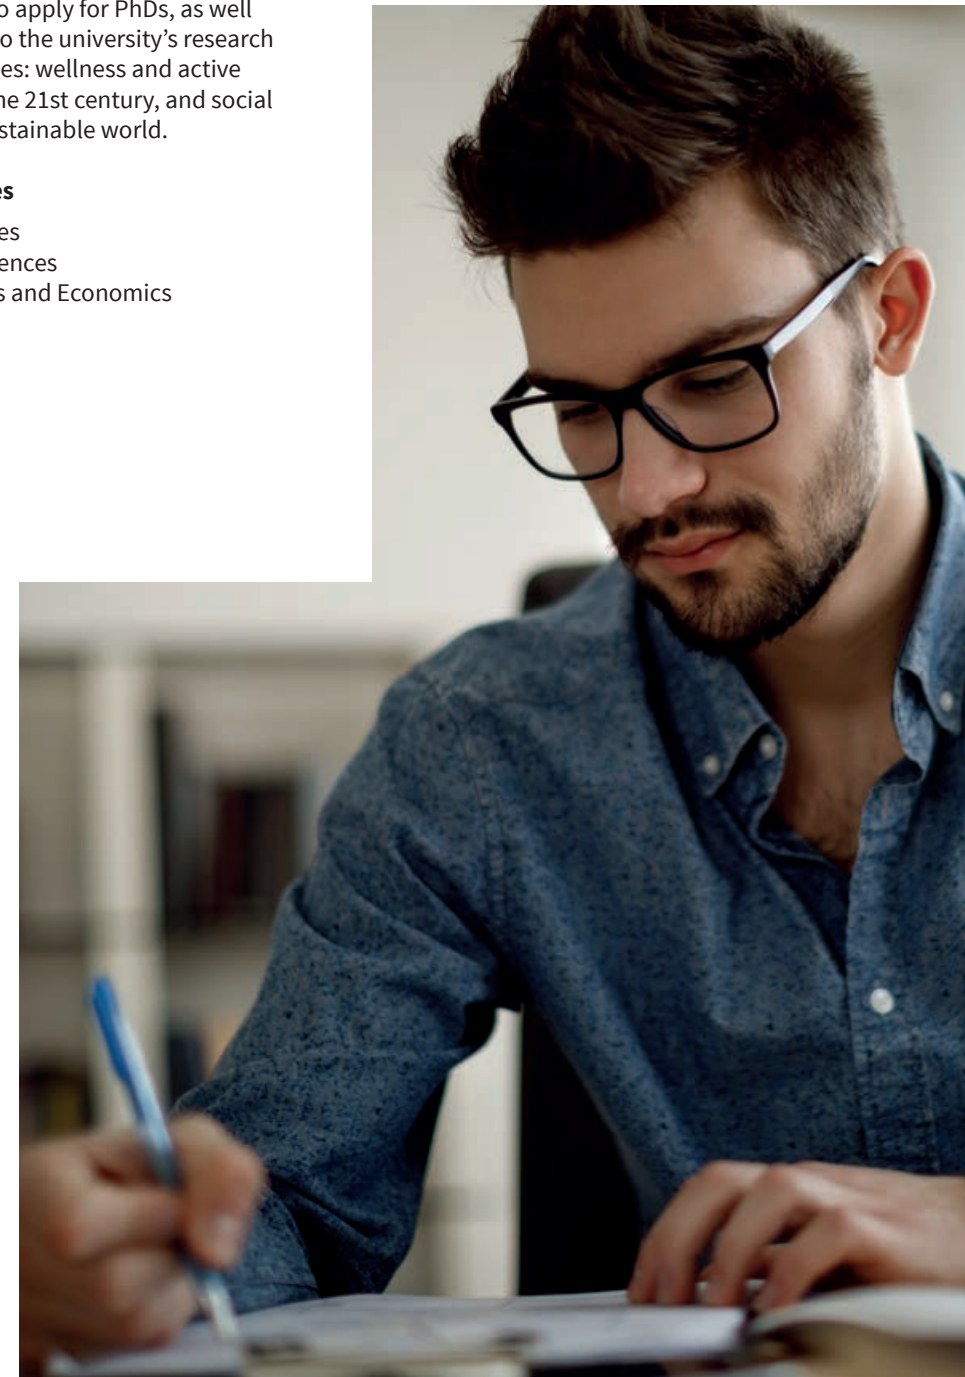

Patricia. UCJC student

International Doctoral School (EID)

An interdisciplinary academic centre whose main objectives are the organisation, planning and development of doctoral studies, the training of researchers who wish to apply for PhDs, as well as any activity related to the university's research and innovation strategies: wellness and active ageing, education for the 21st century, and social transformation for a sustainable world.

Doctorate programmes

- PhD in Health Sciences
- PhD in Education Sciences
- PhD in Legal Sciences and Economics

UCJC Halls of Residence

Living with students from all over the world.

UCJC university halls of residence cater to students from all over the world, living with them will give students a more global and international outlook and mindset while learning about other cultures, practising languages and building an international network of contacts. They offer accommodation, food, medical care, security and sports club services.

Committed to sports

UCJC is part of SEK Education Group and has since its origins a strong link with the world of sport, as a vital element in its educational action. The only educational institution who is two-time winner of the prestigious National Sports Prize.

We lead an innovative high performance sports programme, one-of-a-kind in Spain, through the **SEK International Sports Academy**. A programme that supports young athletes by accompanying them from school and enhances their university and professional training.

The Villafranca Campus is houses the **UCJC Sports Club**, a unique university sports club. Over 40,000 m² devoted to a wide range of sports:

- 10 tennis courts
- 5 padel tennis courts
- Gym
- Multipurpose rooms
- Heated indoor swimming pool
- 7-side football pitch
- Horse-riding facilities: covered riding arena and competition track
- Sports pavilion
- Outdoor sports court
- Physiotherapy centre

The new UCJC Sports Centre is an over 4,500 m² space with a multisport pavilion with approved courts for handball and futsal, basketball, volleyball and badminton. It offers four multipurpose rooms and two athletics tracks, where official competitions will be held.

UCJC Labs Learning Spaces

Where your ideas come to life.

UCJC is a place where knowledge is transmitted, where you can specialise in the field of your choice, improve your general knowledge and develop as a person. Our new labs foster reflection and debate and offer active teaching/learning methodologies based on cooperative work, the development of creativity, critical thinking, visual thinking and communications skills.

- **MediaLab**
- **LanguageLab**
- **DesignLab**
- **LearningLab**

Professional careers

The Professional Studies Centre offers the tools and training necessary for a successful professional career and in global and multicultural contexts.

Students will discover what the professional world is like, what trends are defining the new job profiles, how an entrepreneurial attitude can help them build their professional brand and what essential skills will help them join the job market.

We guide and accompany them in three areas: guidance, professional development and networking.
